FINDING THE RIGHT SQUARE BALER JUST GOT A LOT EASIER

THE LEADER IN HAY INTRODUCES 8 CLASSES OF BALERS
BASED ON THE GROWERS’ OPERATION & THE SIZE & DENSITY OF THE BALES NEEDED

From family farms to big-time biomass, every operation has different needs. Hesston by Massey Ferguson® introduces eight square baler classifications based on plunger force. The plunger force, measured in kilonewtons, is the amount of force on the face of the baler’s plunger. This determines how dense the bale will be. The higher the plunger force, the higher the classification number.
